

Project Name: Artisan AI Chatbot

Description

Artisan AI Chatbot is an intelligent, customizable assistant built to handle natural human conversations powered by OpenAI's GPT-4o model. Designed for use in customer service, education, and internal tools, it supports multi-turn chat, real-time Q&A, and flexible model integration. Whether you're managing clients, streamlining workflows, or deploying internal knowledge agents, Artisan AI offers an intuitive and scalable solution.

Key Features

- ✓ **Multi-turn conversation:** Handles context-rich, back-and-forth interactions w/ GPT-4o Model
- ✓ **Integration:** Fast and accurate language understanding
- ✓ **Flexible API Endpoint:** POST to /ask or /ask/chat/completions
- ✓ **Query Engine Customization:** Plug in your own data, tools, or embeddings
- ✓ **CORS-ready:** API can be called from any frontend or web domain
- ✓ **Model Listing Endpoint:** /ask/models returns supported models
- ✓ **Output Logging:** Ideal for capturing chatbot usage for analytics
- ✓ **Ready for Deployment:** Easily host on Render, Railway, Vercel, or custom servers

Reach / Use Cases

- ✓ Customer service agents for websites
- ✓ Educational tutors for student Q&A
- ✓ Internal documentation bots
- ✓ Custom LLM apps using own data
- ✓ Chat widget for product demos or marketing
